

PITCH DECK

SLIDE 1: THE PROBLEM

smart water bottle to track

Market Insight: The smart water bottle market is a rapidly expanding niche within the global connected health and wellness industry, projected to grow at a CAGR of over 15%. This growth is fueled by rising health con...

SLIDE 2: OUR SOLUTION

Key Features:

1. Core Intake Tracking & App Sync: A capacitive sensor strip integrated into the bottle's wall measures water volume changes in real-time. This data is synced via Bluetooth Low Energy (BLE) to a companion mobile app, providing users with a
2. Dynamic Hydration Goal Engine: The mobile app calculates a personalized daily hydration goal by integrating with Apple HealthKit or Google Fit to pull user biometrics and activity levels. The goal dynamically adjusts throughout the day based on
3. Intelligent Reminders: An RGB LED ring at the base of the bottle provides customizable glowing reminders. The timing is intelligent, based on the user's progress towards their dynamic goal and their daily schedule (by syncing with their phone's calendar to avoid interruptions during meetings).

SLIDE 3: THE ASK

We're seeking seed funding to develop our MVP and capture market share in this growing industry. Contact us to learn more about this opportunity.
